SEP - 9 1999

Date Sept 10 - 1999

The CALFED Bay-Delta Program welcomes your participation. Please use the space below for your written comments (attach additional sheets if necessary).

Comments:

In my opinion CAL-FED's current approach does not include the full potential for WATER CONSERVATION; today's technologies could reduce ~~farm~~ ^{use} farm, city etc. 10-30%; conservation needs to make building of new dams "unnecessary".

The peripheral canal should not be built if water diversions will take H₂O from fish, animals & people

Those interests who will benefit from any new canals reservoirs etc should pay for them in full - not taxpayers!
